

Labour Mobility within Canada

The College of Physiotherapists of Manitoba is committed to the principles of labour mobility and the movement of registered physiotherapists across Canadian jurisdictions as articulated in the Agreement on Internal Trade (AIT) 2009 (Chapter 7)

The movement of physiotherapists under the agreement[s] is based on the similarities of categories of registration (otherwise known as permit on permit). Where the agreement[s] does not apply, the Regulator's registration requirements remain the same.

Applications for registration should consider the following:

- a) Applications from physiotherapists **currently registered** with a practice certificate/license in another Canadian jurisdiction will be considered under the rules of the mobility agreement[s]. Where the categories are similar, no new requirements will be expected of an applicant with the exception of a review of previous discipline history and other administrative matters (e.g. fees, form, liability insurance). Where the categories of registration are **not** similar the College's existing registration requirements apply.
- b) An applicant **not currently registered** to practice in a jurisdiction in Canada must meet the existing registration requirements of the Regulator (labour mobility agreement[s] does not apply).
